Parkwood Vision Center

Dr. William and Wendy Pope

As you drive past 1102A S. Friendswood Drive, you can't miss Parkwood Vision Center's trademark eyes on the front of the building. Within the 2,000-square-foot facility, Dr. William and Wendy Pope offer full eye exams, contacts, glasses, eye-disease treatment, co-management for LASIK and cataract surgery, and more.

After running the business for two years, the Popes moved along with their three children from Pearland to Friendswood. Eight years later, they wouldn't have it any other way. "We love it here," said Wendy Pope.

Dr. Pope is the primary doctor at Parkwood Vision Center, where he spends most of his time treating

patients. In addition to her work at the vision center, Wendy Pope also serves as Education Foundation Director for the Friendswood school district, of which she's a huge proponent.

What the Pope family loves the most about Friendswood is how welcoming the city and its patrons are. "You get what you put in to Friendswood. You have the chance to really get to know people and everyone is ready with open arms," said Wendy Pope.
